OUR MISSION & VISION

Through internationally recognized programs, partnerships, and dynamic research, AUIB will create global citizens, leaders, and innovators who will effect change in the world.

Our students will graduate with strong skills in critical thinking, not just rote memorization, and will develop a deep appreciation for life-long learning.

Our students will be held to the highest possible academic standards and will be encouraged to support creative and independent thinking.

Our students will be challenged to think for themselves and will be challenged to think globally, as educated citizens of the world.

FOUNDERS' MESSAGE

We believe no country can develop and flourish unless there is modern education, as education is the foundation upon which a nation and its communities' institutions are built. Iraq has suffered, and persevere through myriad challenges, but there is now a glimmer of hope because of the hard work of Iraqis themselves; a new start for a promising future.

I am Saadi Saihood and my sons and I have made it our family's mission to usher our country out of its legacy of terrorism and turbulence. The idea of establishing the American University of Iraq – Baghdad came to us at a family gathering with my sons, Hussein, the eldest; Ali, the middle; and Yousif, the youngest. Since then we have worked day and night to create a contemporary university with a solid foundation of exceptional faculty and staff and partnerships with some of the oldest and most prestigious universities in the United States. This university will create a new foundation for Iraq, and become the first of its kind in Baghdad and the largest academic and research institution in the Middle East.

As a family, we believe that Iraq deserves to reclaim its historic place as the cradle of civilization. Mesopotamia was the source of all other civilizations, the home of the first prophet and the founder of the world's first laws.

The sun must rise and a new generation must rise, as well. We believe Iraq can only be rebuilt by its own sons and daughters because they carry the hopes and dreams of not only themselves, but of those before them. It is time to create a new generation of Iraqis who lead a united nation into the future.

Saadi Saihood & Sons
 Founders

BOARD OF TRUSTEES' VISION

The American University of Iraq – Baghdad (AUIB) is governed by a Board of Trustees (BoT), which has responsibility for all matters of policy. The BoT has 11 voting members, but non-voting members may be added to the BoT as needed.

Broadly, the BoT determines the vision of the University and sets the parameters for activities to achieve its vision. The University looks to the BoT for approval of every policy, the award of academic and honorary degrees, and contractual agreements with other entities—governmental, educational, commercial. The BoT is responsible for all budgetary and financial issues. BoT authorities may be delegated as deemed appropriate by the BoT.

The BoT assures the comprehensive and orderly operation of the University: it approves new programs and schools, changes to the curriculum, senior level appointments, and developments for the benefit of the University. It has broad responsibility for governmental relations in Iraq and abroad.

Board of Trustees' Vision

AUIB will be comparable to a Tier 1 research and teaching university, achieving the highest standards of instruction and research across the entire spectrum of educational programs. AUIB will be an example for best practices in education. The mission is for AUIB to prepare a new generation of leaders, in all fields, for Iraq, and, indeed, for the Middle East in general, leaders who will focus on the needs and requirements of the nations of the region and each professional field. In particular AUIB will address the role of women in the region, to help each nation develop the untapped potential of talent, initiative, and skill of this fifty-plus percent of the population. AUIB will model its programs after the American system of higher education, utilizing all the best elements of the system in appropriate ways for Iraq and the Middle East. AUIB will focus on soft skills (team-leading, team membership, communication, collaboration, and problem-solving) as key elements of education, in addition to the requisite areas of specific knowledge.

A MESSAGE FROM THE PRESIDENT

What is envisioned for the American University of Iraq - Baghdad is a strong, independent University that is recognized as an outstanding teaching and research institution, a University that empowers students to act responsibly and to effect personal, social, political and environmental change within a global context.

AUIB will have a transformative impact on Iraq and the Middle East by distinguishing itself as an exceptional and diverse learning community offering the highest caliber of academic programs and continual innovation in research, creativity and entrepreneurship.

Our students will enter a global society and to ensure their success we are going to internationalize our student body and our curriculum, eventually bringing to this campus the best and brightest students from throughout the MENA region, from Europe, from Asia, from the United States and beyond.

At AUIB, we will not just graduate students; we will graduate leaders...the future leaders not only of Iraq but future leaders of the world.

President Dr. Michael W. Mulnix
at AUIB's soft opening
Baghdad, 14 February 2021

Today I am welcoming AUIB as a modern university in Iraq higher education establishments. It is, too, important that I wish this university a great success. AUIB success means a better chance of education to Iraqi students and strengthening our countries' relations.

U.S. Ambassador
Matthew H. Tueller
at AUIB's soft opening Baghdad, 14 February 2021

AUIB COLLEGES

COLLEGE OF ARTS & SCIENCES

Interdisciplinary work is the future. Our students will learn side by side with eminent scholars and in state-of-the-art facilities, so they can contribute to society at the highest levels. We set the bar for teaching, research, and scholarship. Building a spirit of inquiry, the college will create lifelong learners who contribute to the greater good; independent thinkers who succeed in a global society.

COLLEGE OF

BUSINESS

AUIB will educate leaders who create value and new opportunities in a rapidly growing and developing country. With a global perspective, these leaders will tackle national challenges with a dynamic combination of business and technology that has real impact. Hands-on learning, research, and a focus on entrepreneurship will bring Iraq's brightest minds to the forefront of economic, industry, and business advancement in the nation.

Creating a culture that is learning-focused and student-based, the College of Business educates and mentors students to become the next entrepreneurs, business executives, scholars, and community leaders. The college prioritizes practical experiences, ethical values, and sharpen real-world skills by fostering a collaborative environment where students can work in a professional, team-oriented capacity.

AUIB COLLEGES

COLLEGE OF INTERNATIONAL STUDIES

The College of International Studies prepares a future generation of world leaders. The College's mission is to help students connect their own life experiences with people, places, and events around the world and to prepare them for careers in diplomacy, government, the public sector, and international organizations, as well as to become well-informed and socially responsible citizens. The College offers an interdisciplinary curriculum that examines international and political issues within specific regional, cultural, historical, philosophical, and social contexts.

**BE THE CHANGE YOU
WISH TO SEE IN THE
WORLD.**

COLLEGE OF **PHARMACY**

AUIB is developing future leaders in pharmacy practice and science at its College of Pharmacy. The College's purpose-built facilities support high-impact research and clinical innovation. Focused on delivery of patient-centered care, the curriculum trains new pharmacists to be leaders and innovators in the industry. The Pharmacy program informs of best practices via award-winning and world-renowned faculty whose work has impacted students and patients around the world.

COLLEGE OF **HEALTHCARE TECHNOLOGIES**

By developing the next generation of healthcare professionals and specialists, the College of Healthcare Technologies enables our communities to live better and healthier lives served by experts who use the latest technologies and cutting edge treatment approaches. Professionals from a wide variety of specialties transform medical and rehabilitative healthcare training which is supported by classroom instruction, direct clinical experience, and research, using the newest in healthcare applications that can better diagnose and effectively treat patients. The College of Healthcare Technologies strives to create an environment that fosters critical and innovative thinking to best serve the healthcare needs of society.

COLLEGE OF **NURSING**

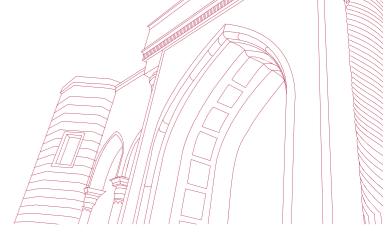

Nursing is one of the fastest growing professions around the globe, and AUIB knows that well-educated and clinically prepared nurses are essential to the future of quality healthcare in Iraq and the region. The College of Nursing creates healthcare professionals who believe in excellence and innovation in patient-centric care. Our rigorous academic and clinical curriculums focus on technical and simulated learning

environments that truly prepares future professionals to practice across varied settings, including the emergency department, operating room, intensive-care unit, maternity suite, and outpatient clinic. The College's well-rounded approach to education enables future nurses to develop critical thinking and communication skills necessary for the complex and ever evolving healthcare profession.

COLLEGE OF **DENTISTRY**

The College of Dentistry is a learning and research program that offers students one of the most sought-after International professional skills. The College is committed to an integrated health approach that graduates future-ready practitioners to deliver research- and person-centered patient care. A curriculum focused on providing comprehensive, quality care is supplemented by state-of-the-art classrooms, patient examination learning centers, and purpose-built research laboratories. The College aims to provide contemporary educational programs that prepare dentists and dental specialists dedicated to the public good and lifelong learning. It will also partner with AUIB's 200-bed teaching hospital to serve the Baghdad community.

COLLEGE OF LAW

The AUIB College of Law will revolutionize the study and practice of law in Iraq by instilling the importance of issues that matter, including constitutional law, civil rights, national security, criminal justice, and international trade and policy. The College of Law will educate future leaders of genuine excellence who will become the country's leading legal experts, public servants, and agents for change in the domestic and global contexts. Our intellectually rigorous curriculum was created in collaboration with the heads of the Supreme Judicial Council and its Judicial Institute to best prepare competent and confident legal professionals ready to engage with the world's most challenging issues within and across borders, jurisdictions, and industries. Our world-class legal education focuses on exceptional teaching and groundbreaking scholarship, while incorporating the vast interdisciplinary resources that our University has to offer.

COLLEGE OF AGRICULTURE & NATURAL SCIENCES

Students at AUIB's College of Agriculture and Natural Sciences will effect tangible change in the world around us. With a focus on sustainability, energy, responsible resource use and conservation, agriculture production systems, and more, students will impact society's greatest challenges. College programs are based on interdisciplinary scholarly instruction, dynamic research, and real-world experiences through which students receive a transformative education that addresses key challenges in the nation, region, and around the globe.

COLLEGE OF COMMUNICATIONS & MEDIA STUDIES

Communications networks, applications, integrated media forms and technology form the basis of global interconnectedness and solutions to modern challenges. AUIB's College of Communications and Media Studies will lead students through critical theory and analysis and practical experience to inspire creative thought and build skills that motivate students to become global thought leaders in journalism, communications, marketing, advertising, public relations, film, and other visual arts.

COLLEGE OF ENGINEERING

The College of Engineering at AUIB will create not simply excellent engineers, but the future engineering leaders of the nation; global citizens with an eye to serving the greater good. Hands-on, practical learning experiences and a rigorous academic curriculum paired with undergraduate and graduate research will drive development of Iraq's industries, making the nation's economy a growth hub in the region.

COLLEGE OF ARCHITECTURE & DESIGN

A foundation in theoretical and hands-on education and research will create internationally competitive architects and design professionals. Form, function, and artistic aesthetic learned through the lens of technology, history, cultural value, practical use, and exploration will create professionals with the capacity to enhance the human experience and the world around us. AUIB's institutional values of creativity and innovation will drive an academic experience that employs architecture and design to affect our society, our communities, and the wider world around us.

COLLEGE OF EDUCATION

AUIB believes the most pressing issue of our time is the education of our youth, and that the future of nations rest on the quality of and respect for its educators. The College of Education will prepare exceptional teaching, service, and policy leaders who think critically and inspire the nation's next generation. Our future teachers will engage in evidence-based practices to support students, schools, and organizations to foster systemic educational improvement across Iraq. Research-based education practice and policy have the power to create a more just and prosperous society.

COLLEGE OF MEDICINE

AUIB's College of Medicine is dedicated to the educational, intellectual, professional, and personal development of the exceptional students who will pursue careers in medicine and public health. Our faculty will provide outstanding health and wellness programs through transformative innovation. Our number-one goal is to advance healthcare and improve outcomes across Iraq through outstanding education, research, and skilled clinical care, regardless of culture or circumstances. Our physicians, scientists, and healthcare professionals will improve human health through innovative curricula and new educational and clinical models built upon a patient-centric approach. Our mission is to encourage a diverse and inclusive medical community dedicated to improving health and well-being for all citizens in and throughout the MENA region.

TEACHING HOSPITAL

The American University of Iraq-Baghdad (AUIB) Medical Cluster is comprised of a College of Medicine affiliated with a (210) Bed Teaching Hospital, and a Radiotherapy Oncology Center.

The Cluster aims to offer access for a high-quality, patient-centric care that is coordinated and conveniently located at a prime location in Baghdad in Iraq. The University Hospital is intended to offer our patients a world leading medical expertise through high quality and cost-effective care. The

hospital shall follow the highest international healthcare standards and protocols to deliver excellence in quality, safety, and patient satisfaction through its offerings of comprehensive tertiary care services on an in-patient, an out-patient and referral basis.

The 210-bed, acute care, general medical/surgical private hospital shall have state-of-the-art facilities supported by renowned international team of Physicians holding American, and European Board Certification. The aim is to ensure that patients receive this optimal worldwide standard of care and education at their doorsteps in Iraq.

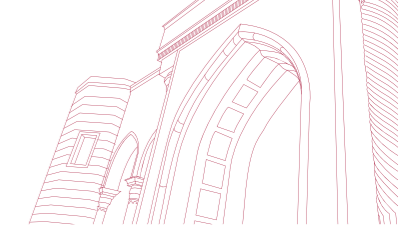

LAB SCHOOLS

The lab school will serve 120 children when it launches its Kindergarten – 6th grade program in January 2022. When the facilities are fully operational and serving K – 12, they have the capacity to educate 840 students.

The AUIB Laboratory School will implement a curriculum which has critical thinking and analysis at its core and where teachers encourage each individual to ask not just why but also what if? Students will be encouraged to learn to form their own opinions and then use evidence to rethink their ideas. “We are all on a piece of research together” is how John Dewey’s philosophical work on pragmatism in the original Laboratory School was described. His school created a “community of inquiry” and promoted and fostered children’s natural intellectual curiosity and creativity by encouraging each child to be inquiring and to follow his/her interests.

LIBRARY

The Library also subscribes to a comprehensive streaming video service and services offering access to four million university dissertations and theses with at least two million in full text format. Online academic video services also offer access to more than 66,000 titles spanning the widest range of subject areas including anthropology, business, counseling, film, health, history, music, and more.

THINK TANK

AUIB has established the Center for the Support of Higher Education in Iraq, a “think tank” that will bring together international experts and Iraqi officials and academics to support reforms in higher education across Iraq in all its public and private universities. AUIB has invited American and European international NGOs, as well as UNESCO, to join this Center, of which three have already agreed to join. Through this Center, AUIB hopes to support a process of finding Iraqi solutions to Iraqi problems” and to bring international support and expertise to the process in restoring Iraq’s historic leadership role in higher education in the larger region.

AMERICAN SPACE

AUIB, under the U.S. Department of State’s “American Spaces Program,” is opening the largest American Corner in the world! This Corner will be a place where speakers and experts can meet with students and other Iraqi audiences from universities and high schools, and students wanting to study in the U.S. can get student advising services and learn about academic programs at any of more than 3500 universities in the U.S. The Corner will also provide students with opportunities to work, to practice their English in professional settings, and to learn more about American culture and history. With the strong support of the U.S. Embassy in Baghdad, the American Corner will support all Iraqi students wishing to study in the U.S. and not just AUIB students.

THE CONTINUING EDUCATION INSTITUTE (CEI)

The Continuing Education Institute (CEI) at the American University of Iraq - Baghdad (AUIB) will represent the gateway to the corporate world,

and an education provider for working professionals. CEI will be working closely with all AUIB colleges and other subject matter experts and organizations to

build workshops, courses, certificates, diplomas, and special programs. All CEI offerings are not for credit, and the following table includes details of their lengths:

Offering	Length	After completion
Workshop	3-15 hours	Certificate of Attendance or Completion
Course	30-42 hours	Attestation or Transcript
Certificate	Minimum of 4 courses	AUIB-CEI Certificate
Diploma	Minimum of 8 courses	AUIB-CEI Diploma
Special Programs	Two weeks to one month	Certificate of Attendance or Completion

MISSION

CEI’s mission is to meet the training needs, and provide access to trending knowledge for individuals and organizations in Iraq, and beyond.

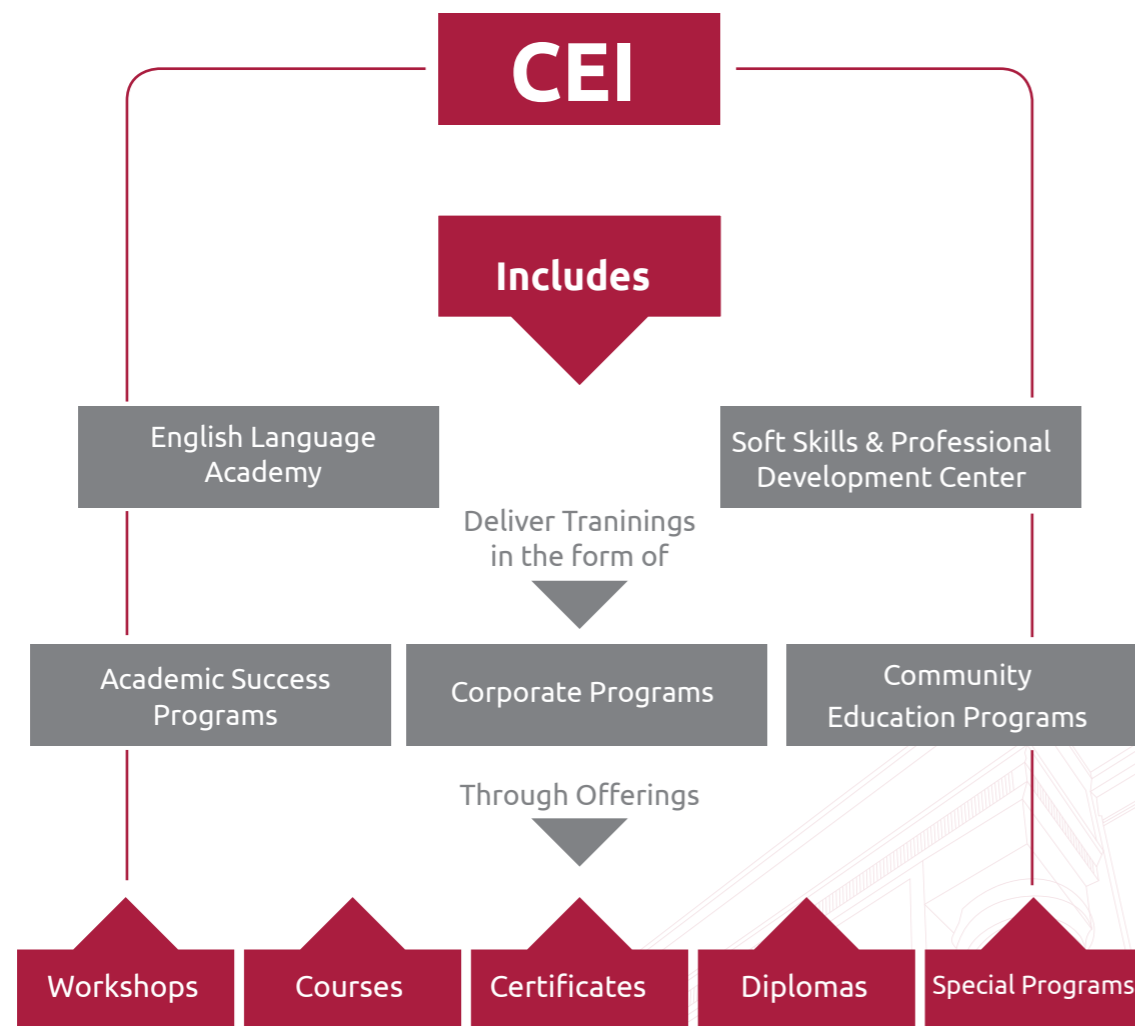

VISION

CEI aims to become the enabler for advancement in all sectors, through providing advanced, and innovative education models.

CEI FRAMEWORK

CEI OFFERINGS

CEI's plan is to build programs of studies based on market demand and research. The decision is to start with two programs of studies, that will include workshops, courses, certificates, diplomas, and special programs—the initial programs for professional development are Business & Management and Science & Technology.

The selected topics for Business and Management are:

- Project Management
- Strategic Management
- Leadership Studies
- Office Management
- Risk Management

The selected topics for Science and Technology are:

- Artificial Intelligence
- Mobile App Development
- Online Community Management

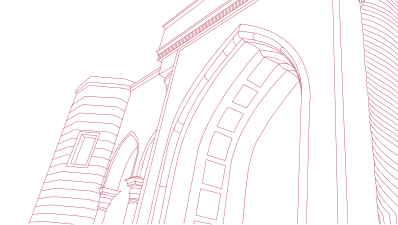

As for the soft skills workshops and courses, they will include:

- Communication Skills
- Presentation Skills
- Time Management
- Conflict Resolution
- Stress Management

CEI's plan is to build additional topics in the initial program of studies as per market need and introduce new programs.

CEI will also work on triangulations with international providers such as Microsoft, Cisco, Project Management Institute (PMI), etc. CEI will become an authorized center and the testing center for those vendors whose certificates are highly requested by the market.

CEI will also deliver tailored and academic English training programs, through the English Language Academy for students, professionals in service, and corporate clients.

DIRECT ADMISSION & REVISED ADMISSION REQUIREMENTS FOR UNDERGRADUATE STUDY **AT AUIB**

We are excited to share with you our most recent development regarding admission of new students. The Ministry of Higher Education and Scientific Research (MoHESR) granted AUIB the privilege of direct admission of students. Prospective students can now submit their applications directly to the Office of Admissions at AUIB. They can submit their application early on, during grade 12 and do not need to wait for the Baccalaureate exam results to be published and admissions portal of the central admissions department, pertinent directorate of the ministry, to open.

ENGLISH LANGUAGE ACADEMY

AUIB's English Language Academy will become the leading institute for English-language education in Baghdad. Its international teaching faculty prepares students for success as active participants in the University's colleges, and also reaches out to the public, and working professionals with its programs to foster or further develop English skills for use in the workplace or within their communities.

ACADEMIC PARTNERSHIPS

AUIB partners with globally recognized public and private universities, and colleges to leverage expertise, and share resources that engage and enrich the University's students, faculty, and the communities in which we live and work. By expanding access to the best thinkers and scholars through these collaborations, AUIB drives innovation and creativity.

STUDENT LIFE

The Department of Student Life offers a variety of programs and services that are designed to complement and enhance students' educational experiences at AUIB. These programs orient new students to the University, provide opportunities in leadership, strengthen social skills through recreational activities, and provide a structured, positive campus climate that will help strengthen an overall supportive residential community.

STUDENT LIFE

In addition to information services and resources traditionally associated with Student Life, we provide learning enrichment services, to ensure student success in the University's learning-centered approach to education.

STUDENT SUPPORT SERVICES INCLUDE:

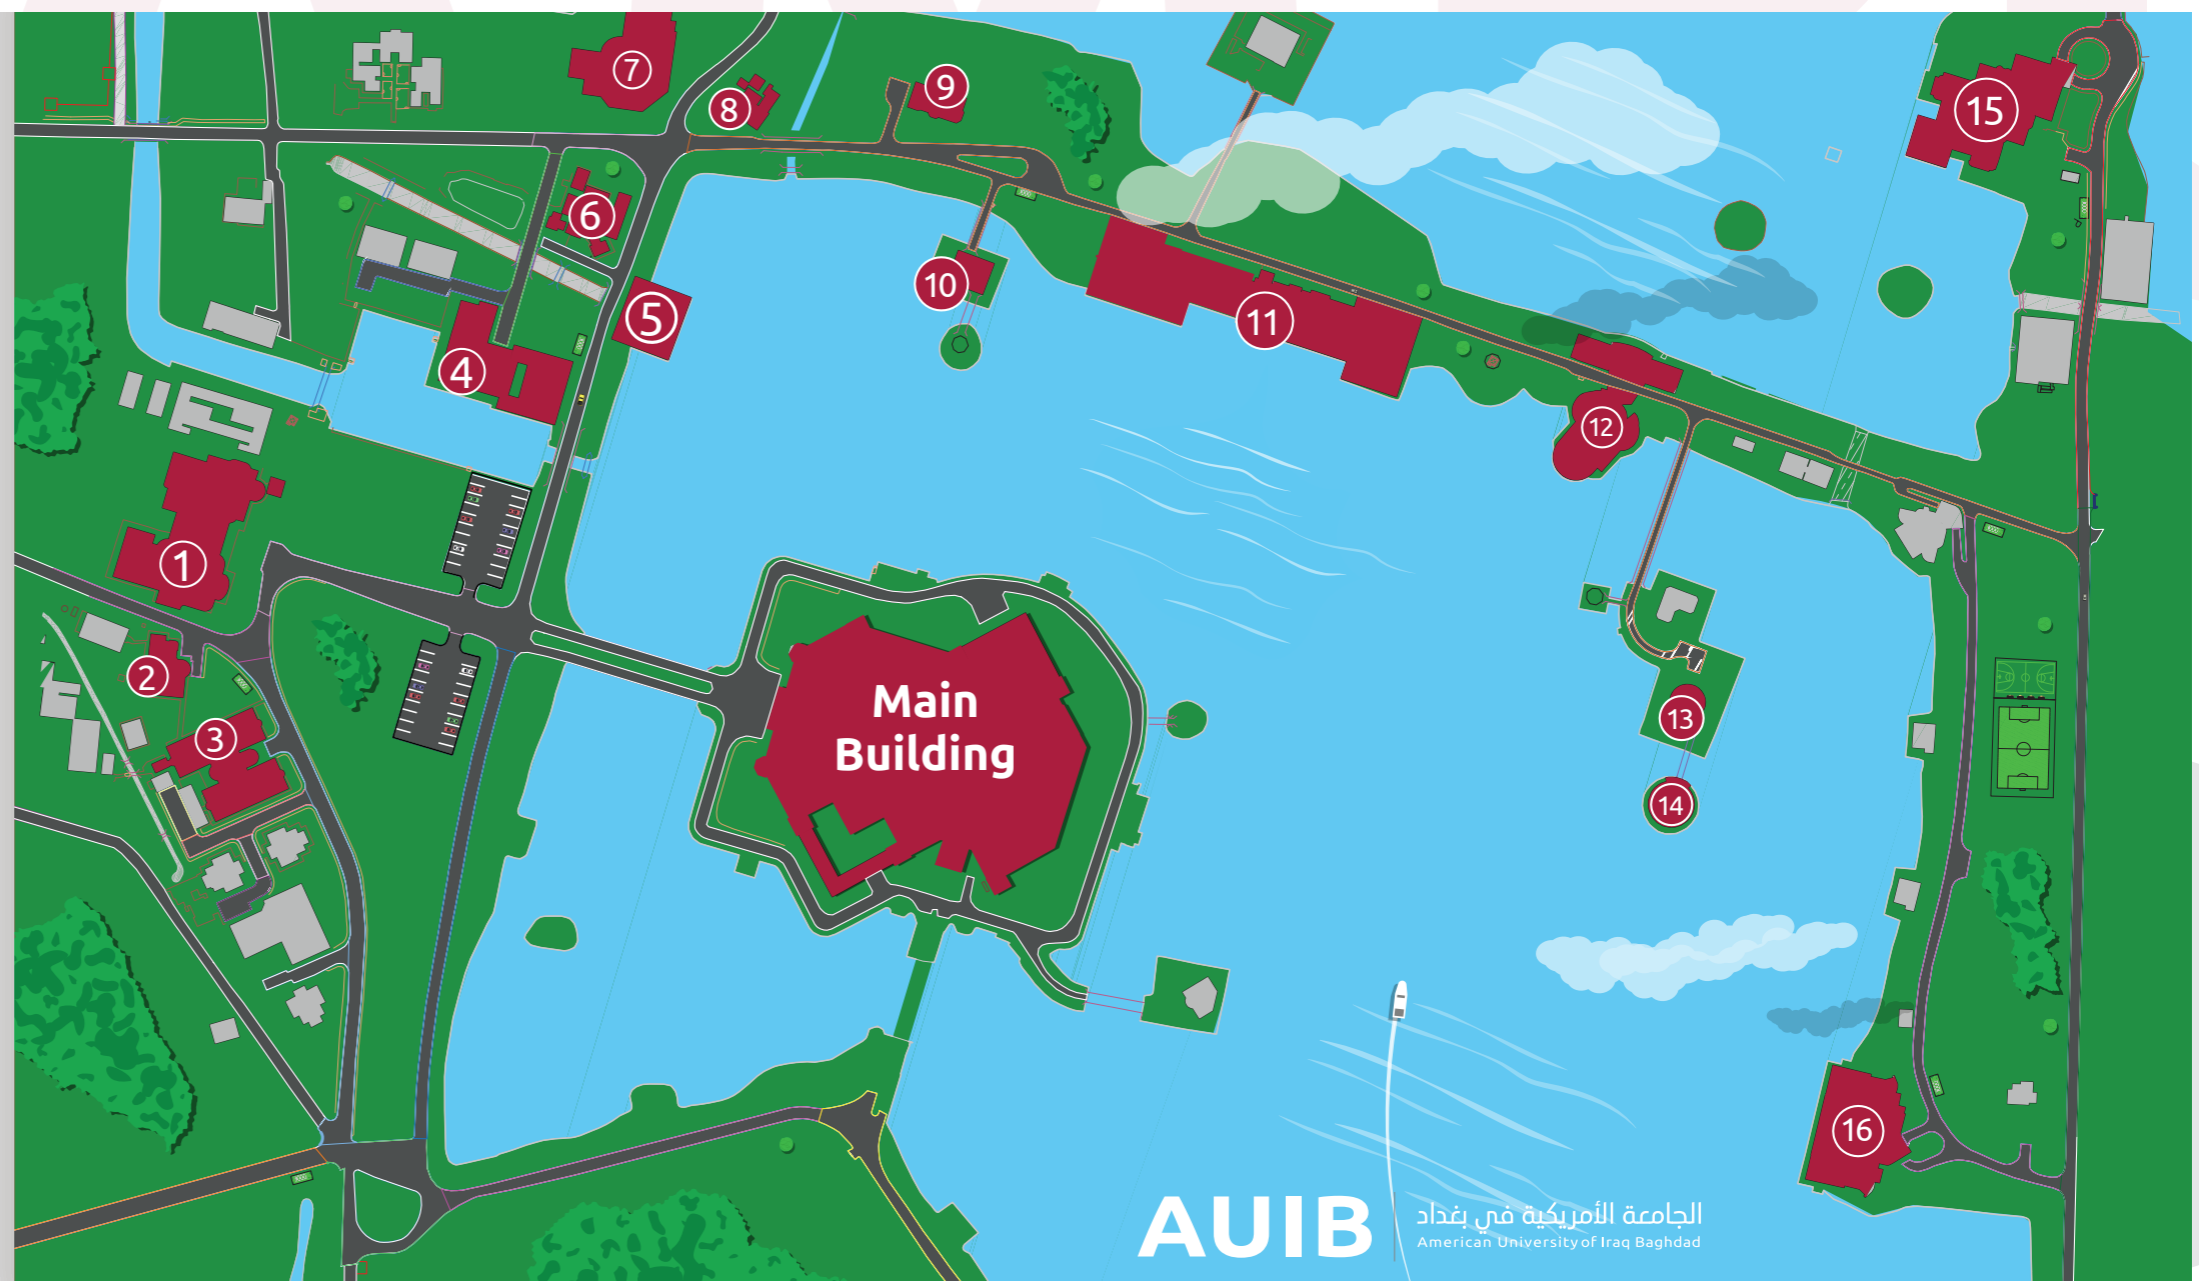

- Collaboration among professional staff, faculty, and students to deliver tutoring and other academic support services
- Non-credit classes, workshops, and seminars that focus on mastering academic skills
- Specialized support centers in mathematics, reading, and writing
- Peer tutoring to build learning skills, leadership skills, and teamwork
- Counselling and academic advice
- Career preparedness with CV writing, interview strategies, and test taking practice

at AUIB's soft opening
Baghdad, 14 February 2021

AUIB FM

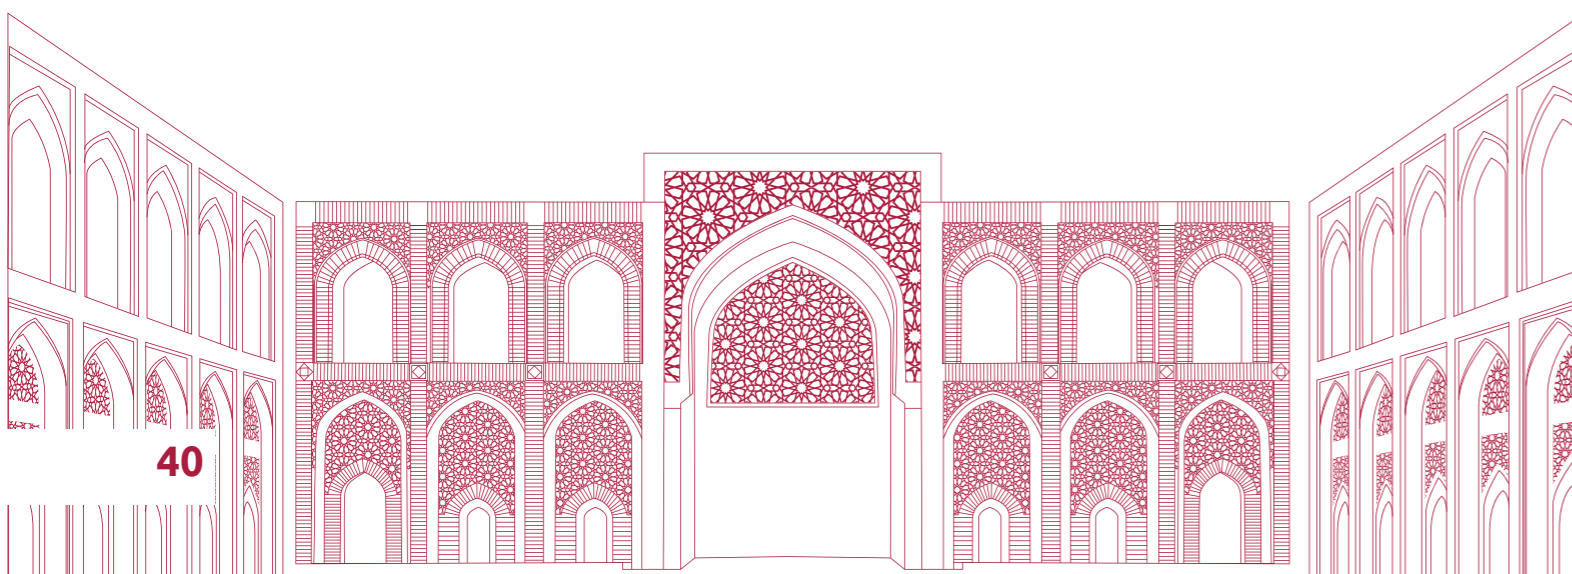

NOT LIKE ANY OTHER STATION

Our 101.5 FM station is like no other in Baghdad. Airing dynamic content 24-hours a day, it serves the community's diverse audiences with inclusive educational programming and socially relevant content.

101.5 FM also interacts with its listeners and encourages feedback, allowing listeners to become a community.

AUIB
RADIO 101.5 FM

SOCIAL MEDIA OUTREACH

WE KNOW HOW TO
HAVE FUN

Our social media outreach has a 40% viewership in the country, with fun and interesting content. Our social media channels are a bridge between our AUIB campus community and the world around us.

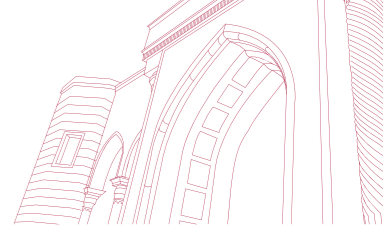

AMERICAN UNIVERSITY OF IRAQ

BAGHDAD

THE HEART OF IRAQ

AUIB will allow students from across the nation to develop their potential in close proximity to the center of business, industry, and government in Iraq. With student dormitories opening soon, students will find everything they need on campus for an authentic college experience, as well as a full academic and social life.

LAND YOUR DEGREE TO OBTAIN A BETTER CAREER

A post-secondary education opens many doors, and is a great way to figure out where your passion lies. As an AUIB student, you will be encouraged to think critically, test new theories and gain valuable, and transferable skills.
